Formerly Incarcerated Transitions (FIT) Program
FreshStart Smoking Cessation Program
Junior Iron Chef Durham
Obstetrics Care Management (OBCM)
Partnership for a Healthy Durham
Positive Parenting Program (Triple P)
Project BUILD
School Health Program
Vital Records
This year, our Administration Division’s interpretation team began offering an award-winning app to better serve our guests with diverse language needs. Our Interpreter Request Service application was recognized with a 2019 Achievement Award from the National Association of Counties (NACo). The awards honor innovative, effective county government programs that strengthen services for residents.

NACo recognized DCoDPh and Durham County Information Services and Technology for their collaboration in creating the application. The app allows DCoDPh employees to quickly request interpretation services for any visitor in need, bridging language barriers and making our services more accessible to all.

In fiscal year 2019, the team recorded 13,901 interpretation requests from 16 areas within the department. The new application decreased the average response time to an interpretation request from 15 minutes to 38 seconds and reduced costs by 79 percent.

“The new application decreased the average response time to an interpretation request from 15 minutes to 38 seconds.”
Medication Drop Box
Free Naloxone to Individuals & Organizations
Safe Syringe Program
Needle/Syringe Drop Box

12,176 STI tests & 8,632 syphilis tests performed

Women’s Health, STI, TB, Refugee Health Testing
Expanded Self-Collection Swabs

Prescription Services
Medication Counseling

120 pounds of medication collected in medication drop box
264 free naloxone kits distributed
12,083 needles/syringes safely disposed

38,064 prescriptions processed
100% of prescriptions filled accurately
Health Promotion & Wellness
The Health Promotion & Wellness team works with community members to share general health and wellness information, build skills to manage chronic conditions, and aid in prevention of future illness. This team of highly trained educators works in community, faith-based and worksite settings on a variety of topics, including physical activity, tobacco use, diabetes, and chronic pain.

Reproductive Health
Our health education team works to educate the community about reproductive life planning and contraception, improving the lives of Durham’s children and families. We also offer childbirth classes to build expectant mothers’ confidence about their natural abilities to give birth and to prepare mothers to care for the entire family once the baby arrives.

Non-Traditional Testing
We provide HIV and Hepatitis C testing in community outreach settings and within the Durham County jail. The target population is Durham County residents who engage in high-risk sexual behavior. These programs bring services to clients who cannot visit or do not feel comfortable visiting our building.
Project BUILD (Building, Uplifting, Impacting Lives Daily) is a gang intervention program that provides coordinated case management and intensive services to youth and young adults between the ages of 14 and 21 who are at high risk of gang involvement. Project BUILD’s street outreach workers work one-on-one with young people to model pro-social behavior, support positive decision-making, connect youth to school and employment, and support involvement in positive activities. In fiscal year 2019, Project BUILD connected 40 clients to educational services; 6 completed high school, receiving a diploma or GED; 14 completed probation; and 26 were connected to employment.

Bull City United (BCU) is Durham’s implementation of the Cure Violence model, which seeks to reduce shootings and killings from gun violence by addressing violence as a contagious behavior. The BCU team currently has six members who work in two neighborhoods, McDougald Terrace and Southside, which were chosen based on the per capita level of violence in these census tracts. At the end of the fiscal year, BCU had a caseload of 53 participants with multiple risk factors for likely involvement in violence. BCU works to connect these individuals to employment and education in order to impact the socioeconomic factors that influence community health. As of June 2019, 57% of participants are employed, and 79% showed gun related behavior change.
The Partnership for a Healthy Durham is a county-wide coalition, based in The Durham County Department of Public Health, that brings together community members and organizations to improve the health of Durham residents.

Partnership members focus on the top five health priorities chosen by the community in the 2017 Community Health Assessment (CHA):

1. **AFFORDABLE HOUSING**
2. **ACCESS TO HEALTHCARE & INSURANCE**
3. **POVERTY**
4. **MENTAL HEALTH**
5. **OBESITY, DIABETES, & FOOD ACCESS**

The Partnership and DCoDPH collected the largest number of surveys ever in the door-to-door Community Health Assessment survey. The larger sample of Durham residents will allow the Partnership to look at the data by race, ethnicity, income, education, and other factors.
The Environmental Health Division aims to promote human health and protect the environment through modern environmental health science, technology, and clear regulations. Paramount to this goal is the use of education during regulatory processes to gain compliance and increase the quality of public health.

**ENVIRONMENTAL HEALTH**

**Inspections**

97% of childcare centers achieved a superior rating.

27% of malfunctioning onsite waste water systems repaired and removed from the notice of violation.

**Local Preparedness Program**

DCoDPH Director Gayle Harris & County Manager Wendell Davis receive their flu shots during a countywide flu exercise.

The Durham County Department of Public Health (DCoDPH) Preparedness Program strengthens and enhances the capability of local public health partners to respond to public health threats such as infectious diseases, natural disasters, and biological, chemical, nuclear, and radiological incidents. This is accomplished by following federal and state guidelines, as well as working closely with other Durham County first responder agencies. To ensure readiness, the preparedness coordinator is charged with developing public health emergency response plans, then training staff and exercises those plans.

This year, the DCoDPH Preparedness Program participated in multiple trainings and exercises, as well as implementation of the Incident Command System (ICS) structure during the following responses: an influenza outbreak, a possible measles case, and the gas explosion. As required by the CDC, the DCoDPH Preparedness Program completed the five-year full-scale Medical Countermeasure (MCM) exercise requirement with the countywide flu exercise.

The coordinator for the preparedness program, Pat Gentry, also instructed the preparedness course taught at the UNC Gillings School of Global Public Health, NC Institute for Public Health, for the Principles and Practices of Public Health Nursing course. After a nomination from the Durham County Fire Marshal, Gentry was chosen to receive the James F. Buffalo award by the North Carolina Emergency Management Association. This award is presented to the person outside of the Emergency Management family who has exhibited outstanding support and leadership to emergency management.
Our **Dental Division** serves children and young adults throughout the Durham community, helping to set the stage for lifelong oral health. We also serve pregnant women of all ages, supporting maternal and fetal health.

### Dental Patients:

**Race**
- 79%: White
- 11%: Black or African American
- 2%: Asian
- 8%: Other

**Ethnicity**
- 88%: Hispanic/Latino
- 12%: Not Hispanic/Latino

### Top Procedures

- **Sealant**: 4,938
- **Oral Eval**: 2,504
- **Flouride**: 2,437
- **Prophylaxis - C**: 1,863
- **Prophylaxis - A**: 999
The Dental Division screened 8,340 students in Durham’s elementary schools, Head Start, and Early Head Start sites. The screenings offered brief oral examinations to children, some of whom had never seen a dentist. The Tooth Ferry mobile unit also began visiting school sites this year. The Tooth Ferry is a fully equipped mobile dental office with two dental chairs, a front office, and a restroom. Features include a side bump-out for additional space in the clinic area, a DVD player and screens above each chair, a hand-held x-ray unit and technology capacity to bring up dental software and x-rays in real time – no matter where the Tooth Ferry is in the county.

For the 2019 Give Kids a Smile event, in which the Dental Division partnered with UNC Adams School of Dentistry faculty and students, the clinic was visited by the school’s therapy dog, Grayson. As an assistance dog, she comforts young patients who are anxious about sitting in the dental chair. Grayson has many unique talents, but perhaps her favorite on-the-job skill is hopping into the dentist’s chair with kids and comforting them by laying her head on their laps. Many of the patients spent time with Grayson, even sitting with her while the dental team provided treatment.

Give Kids A Smile

Durham Public Schools
The **Formerly Incarcerated Transitions (FIT) Program** provides access to healthcare and referrals to community partners for individuals who have recently been in prison. We collaborate with existing reentry providers across a wide spectrum of support services, primary health care providers, and the NC prison system. A Community Health Worker works directly with clients after release to connect them to medical care.

The **Minority Diabetes Prevention Program (MDPP)** is a yearlong program that gives clients tools to help them lose weight and lower the risk of diabetes in just 24 sessions. MDPP’s small groups, offered in English and Spanish, encourage members to share strategies that have worked for them and to support one another’s weight loss goals. Participants are offered course-specific tools that help them make healthier food choices and become more active.

The **Chronic Care Initiative (CCI) Program** gives Durham citizens who are living with certain chronic illnesses access to trained Community Health Workers (CHWs). CCI CHWs, by trade, have shared life experiences with their clients. They see individuals in their homes, in the community, and at the Durham County Department of Public Health. The CHWs use unique approaches with each individual to help identify ways that work for them to help manage their chronic diseases.

The **Nutrition Clinic** provides nutrition education empowering individuals to make informed, sound health choices. In FY 2019:

- **4,033 nutrition contacts**, including individual counseling sessions, diabetes self-management education, and nutrition education for groups
- **96% of clients** seen for nutrition services had a positive outcome at follow-up visit
Durham’s Innovative Nutrition Education

The Nutrition Division’s Durham’s Innovative Nutrition Education (DINE) program provides nutrition education to Durham residents who are eligible for the Supplemental Nutrition Assistance Program (SNAP/EBT, formerly known as food stamps). There are 17,376 households and 35,781 individuals who receive SNAP in Durham County (11.5% of Durham’s population). DINE’s target population includes children, parents, women of childbearing years, and seniors and focuses its services in childcare facilities, schools, community centers, grocery stores, and medical clinics. In FY2019, DINE provided nutrition education to nearly 10,000 Durham residents.

DINE elementary nutritionists have a long-standing relationship with the Durham Public School Hub Farm, coordinating efforts to facilitate field trips that allow students to explore the inner workings of the farm and create nutritious recipes on-site. This year, the DINE partnered with Student U, Rebound Fellowship Church, and the Hub Farm, which lead to the building and establishment of a student-led community garden on campus. Rebound Fellowship provided Student U with startup funds and materials, and students, along with volunteers, built five 10 foot x 4 foot raised garden beds.

Together, the DINE Nutritionist and Hub Farm staff taught a series of classes on gardening, nutrition, and cooking. Students prepared and planted fruits and vegetables in the raised beds and used their produce in cooking labs. This partnership taught students how to grow and cook their own food and has been a positive step toward transforming the food environment in this community.
Women’s Health

Family Planning Clinic
The Family Planning Clinic offers comprehensive contraceptive options. This year, we have been able to increase our capacity to see any woman who enters our clinic needing a pregnancy test or desiring to start same-day birth control.

5,053 clinic visits

Maternal Health Clinic
Our Maternal Health Clinic treats women regardless of income, insurance or documentation status, or gestational age.

Among our services, we offer Centering Pregnancy, group prenatal care which provides social support and empowers women through their pregnancies.

9,465 clinic visits

OB Care Management
This program screens all pregnant women in NC who are eligible based on risk and need. Care managers connect patients to resources and provide one on one support during the course of their pregnancy and postpartum period.

18,000 visits with patients (home or by phone)

Breast & Cervical Cancer Control Program
This program provides breast and cervical cancer screening for women who otherwise would likely not have access to these services, offering free screenings to those in need.

64 clients seen
Child Health

**Triple P**

The Durham Positive Parenting Program, or Triple P, works to connect with community partners throughout the area to create networks of support for parents at risk of toxic stressors, including poverty, violence, and racism. Our Triple P team attends community events such as the Safe Kids Expo and Resident Council meetings in local housing communities, and we host community seminars to offer practical strategies for positive parenting. These supports aim to help parents more effectively meet their children’s material and emotional needs.

**CC4C**

The Care Coordination for Children (CC4C) program provides services for infants, toddlers, and children, birth to 5 years of age, who are diagnosed with special health care needs (chronic physical, developmental, behavioral and/or emotional conditions). Services provided by CC4C nurses and social worker care managers are individualized to meet specific patient needs and risk-stratification guidelines.

---

**School Health Program**

The School Health Program is staffed by a team of registered nurses who support the health, well-being, and academic success of Durham’s 33,000 public school students.

- **12,812** Student encounters/health office visits resulting in the student returning to class
- **32** Student encounters/health office visits resulting in a call to 911
- **1,854** Student encounters/health office visits resulting in the student being sent home
In FY 2019, our Communicable Disease (CD) team...

<table>
<thead>
<tr>
<th>Conducted</th>
<th>The CD Program conducted 9 outbreak investigations during FY 2019, primarily related to influenza and food-borne infections. This team also led the response to a suspected measles exposure at a school’s day care center, ensuring that preventive treatment, lab titers, and vaccinations were provided to prevent further infection in the event the case was confirmed.</th>
